ReportBro is a stand-alone framework licensed as open-source under AGPLv3 for Python developers. It consists of a client and a server part, the ReportBro Designer and ReportBro Lib. The designer is a platform- and browser independent Javascript plugin. It is the tool to visually create report templates. Everyone can design & edit document templates, and preview them directly in the browser. The

HEADER

ReportBro Lib uses report templates together with data to generate pixel perfect PDF reports and XLS. You can use it with your favourite web framework, like Flask, Django and any other Python framework.
